Transport requests in TMS which should be imported before

RepeatSkipTMS - Import Queue

Phase CHECK_REQUIREMENTS: Explanation of Errors

The import queue of the Transport Management System (transaction STMS) contains transport requests that are to be imported before the current Support Package queue. These transport requests are listed below.

Note, that the check uses solely the request attributes, which contain the information about the installed software component versions of the export system at the time of the export. The content of the transport requests is not considered during the check, this means it is not checked whether a real collision with the Support Package content exists. Therefore, the check result and the list of yet to be imported transport requests is only a recommendation which can be ignored and skipped.

If you want to import the transport requests, just use the button "TMS - Import-Queue" to jump directly to the import queue of the Transport Management System.

Phase CHECK_REQUIREMENTS: Transport requests to be imported first

Request	Description
SHDK913254	BR: Issue C033-153
SHDK913283	Aiden RHEL: 3093810 - Executing report RC_VALUE_DISCOVERY_
SHDK913468	DGO GB Adjust KTS accounting
